

Characteristics :

Diamond cutting wheel - PCD (Poly Crystal Diamond)
This quality is used for the cutting of float glass of any thickness.
Perfectly suitable to cut very thin or very thick glass, also for automotive glass cutting.

Wheel diameter :

- 4,20 mm and 5 mm

Advantages :

- Very long lifetime up to 3.500 Km
- Possibility of regrinding the wheel
- Advance technology
- Very low pressure
- Very high score quality
- No chips
- Increase your productivity by reducing the loss of time in changing the wheels and the diminution of the risks of errors
- Available on all the kind of wheel holders
- Axles in steel coated with diamond or DIALIX axles in PCD.
- Despite a high price, thanks to its very long lifetime and the possibility of regrinding up to 4 time, it will allow substantial economies
